

Press release

As one of the world's leading manufacturers of animal shearing equipment, Heiniger presents its new top-of-the-range product, named "Opal". This new clipper is bound to set new standards in terms of noise, power and ergonomics in the shearing and clipping industry for both small and large animals.

Opal – Brilliant in performance & quietness

With Opal, Heiniger AG sets new standards. The new clipper is extremely quiet. It is also impressively powerful and equipped with two speed levels. With 3100 double strokes per minute in fast mode (and 2600 in slow mode), this clipper works smoothly and quickly even through dirty and thick fur and hair. The latest lithium-ion battery technology ensures cordless clipping for over 240 minutes. It takes just one hour for a full battery recharge. Thanks to the built-in battery level indicator, it is always possible to check the remaining battery time.

Opal has a cutting-edge ergonomic design and fits perfectly in the hand. Moreover, this clipper is particularly small and lightweight. Professionals can thus work effortlessly – whether for grooming, veterinary applications or dog, horse and cow styling.

Made in Switzerland

Opal - one more clipper that is developed and manufactured in Switzerland. When it comes to development and production, Heiniger places primary emphasis on precision, power and durability, as well as on a comprehensive quality control.
